Able to Travel / Relocate at Short Notice (UK & Europe)

Age: 42

Full driving licence

CHARTERED ENGINEER

## WORK EXPERIENCE

---

### **07/05 – Present: Self Employed**

*Freelance Quality / Project Manager*

■ List of major contracts to date:

■ **LM Wind Power**

Responsible for implementing ISO17025 at 2x sites (located in Denmark and India)

■ **Lean Horizons Consulting / Vestas Wind Systems A/S**

Consultant Expert on PPAP, training and coaching the client's suppliers located throughout Eastern and Western Europe

■ **Wipac Ltd**

Lead Customer Quality Engineer for electronic lighting units used on the 2010MY Bugatti Veyron. Also fulfilled a PPAP Engineering role developing lighting units for another new high performance sports car

■ **Alu-Plus Ltd**

Interim role taking control of all aspects of the Quality Management System and facilitating the achievement of ISO9001:2008. Task successfully achieved

■ **HBPO Ltd**

Customer-based role, ensuring that all delivery and quality issues were dealt with efficiently and effectively during the product introduction period. This included troubleshooting a number of technical issues with the manufacturing process (Poka-Yoke Implementations) and also the point of delivery method at the customer's assembly point.

Achieved the task with no disruption to the customer and helped HPBO to forge strong links with their new customer contacts

■ **Faurecia Ltd**

SQA Engineering role for all safety critical components (Including Electrical Components; Airbags, etc).

Work included proactive supplier visits throughout eastern and western Europe; analysis of PPAP documents; Problem Resolution and Process Improvement Activities with suppliers and also mentoring a newly-qualified graduate engineer

By carrying out a series of what became known as "Lean-Sigma Events", I successfully reduced PPM by 80% on at least 2x problem suppliers

■ **Brose Ltd**

Took responsibility for Manufacturing Quality of the assembly of electric window regulators. Recovered the number of outstanding customer concerns to manageable levels and restored the customer's confidence

As a result of this success, the contract was extended to take responsibility for Manufacturing Quality of the assembly of seat frames. By identifying and introducing Process Improvements, significant reductions were made on the numbers of customer issues to the extent that the role was further developed to cover Field Warranty Analysis

■ **Johnson Controls Ltd**

Brought into the team to improve product quality and keep scrap/reject costs at manageable levels following the decision to close the factory and relocate production to another facility (Initial 6 month contract – extended to 9 months)

### **04/00 – 06/05 Unipart Eberspächer Exhaust Systems Ltd (UEES), Coventry**

*Senior Quality Engineer (Permanent Role)*

- Lead Project Quality Engineer for the introduction of 2x manufacturing lines (Work featured adhering to APQP requirements including the agreement of standards with the customer; specifying purchasing and personally signing-off of £150k of gauging equipment; preparation of Product Submission Documents; and defining sub-supplier requirements) Project successfully completed within time and budget constraints with no disruption to existing production

- Implemented and maintained the company's ISO/TS16949; QS9000 and ISO9001 accreditations and prepared the company's successful application for Ford Q1 Status

- Also responsible for Supplier Quality / Supplier Development. Took the initiative by creating a formalised database system to track supplier problems and identify repeat offenders thus reducing overall Supplier PPM

## WORK EXPERIENCE (Continued)

---

### **12/97 – 4/00 Birkbys Plastics Ltd, Liversedge, West Yorkshire**

#### *Supplier Development Engineer*

- Responsible for all aspects of Supplier Quality and Development at 2x production sites and personally managed the Goods-In Inspection functions at one site. Was also the company-designated QS9000 Internal Auditor

### **01/96 – 12/97 Marshall Repetition Ltd, Hebden Bridge, West Yorkshire**

#### *Quality Manager Designate*

- Responsible for all aspects of the company's Quality System, including the management of 3 Quality Engineers. Upgraded the company's quality system from ISO9001 to VDA6. Also implemented an MRP2 product / stock tracking system

### **7/93 – 12/95 Saxonmill Ltd, Dewsbury, West Yorkshire**

#### *Project Engineer*

- Managed a project to drill a borehole in order to extract water for use in the company's processes. Later implemented a variety of waste minimisation measures around the factory and introduced a product / stock tracking system

## EDUCATION

---

### **1980 - 1985 Derby High School, Bury, Lancs.**

*8 O'Levels and 4 CSEs*

### **1985-1987 Peel College, Bury, Lancs.**

*4 A'Levels: Maths with Mechanics / Physics / Computer Studies / Applied Engineering & Graphics*

### **1987- 1991 Nottingham Polytechnic, Nottingham**

*BEng(Hons) Degree: Manufacturing Engineering*

### **1991-1993 Staffordshire University, Stafford**

*MSc Degree: Computer-Aided Engineering*
